

Nabeel's Journey: Discussion Questions

26. The Next Scan and Praying for a Miracle

- When you give your testimony (or tell "your story") do you have something that is scripted?
 - Are predefined testimonies beneficial or are they fake?
- Is Nabeel's testimony more powerful because of the cancer and the fact that he doesn't know how this situation will be resolved?
- Stories of miracles can either encourage our faith or fuel our skepticism. What impacts us more, the details of the miracle story, our preconceived notions and worldview that we bring to the conversation?
- Nabeel is very encouraged because of stories of healing around him and by positive "prophetic words" that people are giving him. If God doesn't heal Nabeel is it fair to say all of this was false and deceptive, or is there still something genuine and positive to be said about it?
