

# Nabeel's Journey: Discussion Questions

## 27. The Radiation Didn't Work

- Nabeel suffered through the radiation treatment and it didn't help. Yet, he still clings to his faith and looks to God for healing.
  - Do you think his faith is weaker or stronger after the test results?
- Nabeel stated he understood if some people stopped praying for him and moved onto other things.
  - Is the fact that a situation gets worse (or even hopeless) mean that we should stop praying? Isn't this when we should pray even more?
- If the scan was excellent and all of the cancer was gone, would people say it was a miracle or another case of medical treatment effectively doing what it is supposed to do?
- If you had been given this news, do you think you would have broke down and given up?
- The cancer not only isn't resolved but spread to more lymph nodes throughout the chest. Is this a sign that God will not heal Nabeel?
  - Is it fair to assume that Nabeel's faith isn't enough for God to heal him?
